

How to Download Sims from SimCloud

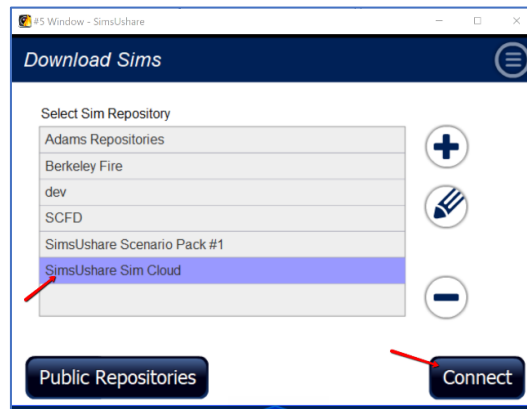

The Sim Cloud is a private storage area for your simulations, which gives you the ability to easily share simulations with your Department. You can access (download and upload) your simulations either through the SimsUshare app or through the CTC Web app (<https://ctc.simsushare.com>). For any questions, please contact us at +1.215.627.8146 or support@simsushare.com.

Open the SimsUshare app and click PLAY or EDIT.

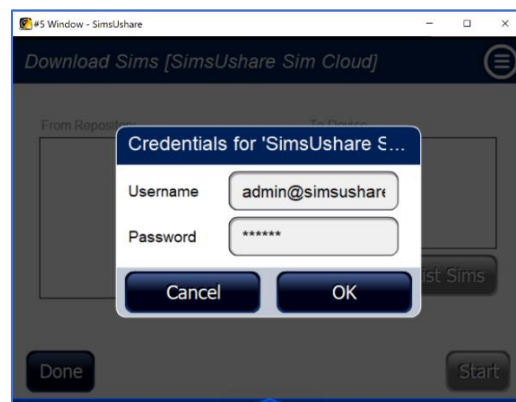

In the menu, choose "Download Sims"

Select the Sim Cloud server, then press "Connect"

SimsUshare will ask you to enter your CTC credentials (login email and password)

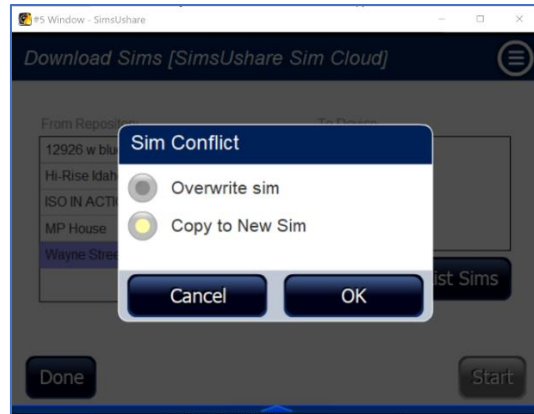

In the box on the left-hand side of the screen will be the simulations stored in your Sim Cloud account.

To download a sim, click on the sim name on the left-hand box, then press the “>” center button. The sim will appear in the right-hand box. Add as many simulations as you’d like to transfer.

Clicking on the “List Sims” button will bring up a box listing the simulations currently on your device.

If you have selected to transfer a sim that you already have on your device, the system will ask you whether you want to: overwrite the sim on your device, or, create a copy. Select which option you would like.

When you are finished selecting the simulations to download, press “Start”. The system will download and unpack each sim, then install the sims into your device’s catalog. When it is finished, it will tell you that the transfer is complete. Press OK to return to the PLAY or EDIT screens.
